

Vacumed® - Blood collection system

VACUmed

The
Vacume
d®

system is one of F.L. Medical innovations. Even this time we treasured our decennial experience in the field of blood collection tubes, in order to obtain one more time the best result.

The quality controls, the raw materials and the technical properties that characterize these products certainly live up to this brand, that wants to represent reliability and certainties.

Vacuum tubes with K2 EDTA

Vacumed® K2 EDTA

Vacuum tubes with K3 EDTA

Vacumed® K3 EDTA

Vacuum tube with lithium heparin

Vacumed® vacuum tube with lithium heparin

Vacuum tubes with sodium heparin

Vacumed® sodium heparin

Vacuum tubes with potassium fluoride

Vacumed® vacuum tube with potassium fluoride + K3 EDTA

Vacuum tubes with sodium citrate for coagulation

**Vacumed® vacuum
tube with sodium
citrate for
coagulation**

Vacuum tubes with sodium citrate for coagulation

**Vacumed® vacuum
tube with sodium
citrate for
coagulation**

Vacuum tubes with clot activator

**Vacumed® vacuum
tube with clot
activator**

Vacuum tubes with gel separator + clot activator

Vacumed® vacuum tube with gel separator + clot activator

Vacuum tube with separating gel + coagulation activator

Vacumed® vacuum tube with gel separator + clot activator

Vacuum tubes with granules separator + clot activator

Vacumated® vacuum tube with granules separator + clot activator

Vacuum tubes plain

Vacumated® vacuum tube without additive white cap

Vacuum tubes plain

Vacumated® vacuum tube without additive red cap
